

KEY INVESTOR INFORMATION

This document provides you with key information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the fund. You are advised to read it so you can make an informed decision about whether to invest.

SWEDBANK PENSION FUND V60 INDEX (limited redemption) (the Fund)

Unit class: one type without nominal value
ISIN code: EE3600001731

Management company: Swedbank Investeerimisfondid AS, subsidiary of Swedbank Robur AB.

OBJECTIVES AND INVESTMENT POLICY

The Fund is a voluntary pension fund. Its main purpose is to provide the Funds' unit holders with additional income in addition to the state pension after reaching the retirement age. The investment objective of the Fund is to achieve stable long-term growth of the value of the assets of the Fund.

The Fund is established as an investment fund with so called passive investment policy, which means that the assets of the Fund are predominantly invested in instruments that follow global equity indices of developed countries and bond indices consisting of investment-grade financial instruments denominated in euros. Up to 60% of the Fund's assets may be invested in instruments with equity risk, and the Management Company shall not react to changes in the composition of such indices. The investment of the assets of the Fund shall take into consideration the ESG (environmental, social, governance) factors or principles of other fields of responsible and sustainable policy (environment, climate, working conditions, company management, etc.).

The Funds' assets may be, inter alia, invested through other investment funds.

Upon investment of the assets, the Fund has not specialised by sectors of economy, regions or countries. The specific ratio of investments in the assets of the Fund shall be determined by the Management Company in the course of its everyday activities.

The Fund may conclude transactions with derivative instruments for the purpose of achieving the investment objectives of the Fund and hedging the risk arising from fluctuation of prices of securities in the assets of the Fund.

The Fund does not allow for discretionary choices for investors in regard to the particular investments. The proceeds from the investments of the Fund are kept by the Fund and reinvested.

Recommendation: the Fund should be opted into for a medium or longer-term investment period (at least 7 years), and the fact that the units of the Fund may only be redeemed once the investor has reached the age of 55, has no work ability or if the Fund is in liquidation (the conditions for the redemption of the Units and payments made from the Fund are described in more detail in the 'Redemption of Units' section of the Prospectus) should be taken into consideration. Therefore, the Fund is more suitable for investors who are reaching the abovementioned age or for an experienced investor for portfolio diversification.

RISK AND REWARD PROFILE

The synthetic indicator shows the correlation between risk and potential reward. The categories specified in the risk scale are based on the fluctuation of the value of the Fund's assets during the last five years. In this respect, category 1 does not mean a risk-free investment.

The Fund belongs to category 5, i.e. it involves higher than medium risk. This means that the Fund is sensitive towards the decline or growth of the value of the assets.

The Fund may incline on the scale both towards the left and the right over time. This happens due to the fact that the scale is based on historical data which is not a guarantee for future risk/reward.

The Fund applies a passive investment policy, i.e. the assets of the Fund are invested in investment funds tracking global equity indices which may in the end lead to a higher level of fees – risk of investing in funds.

The Fund invests up to 60% of its assets in equities, equity funds and other equity-like instruments; therefore, the Management Company consider equity risk as well as market concentration risk and market liquidity risk to be higher than usual in regard to the Fund.

CHARGES

One-off charges taken before or after you invest

| | |
|--------------|-----|
| Entry charge | 0 % |
| Exit charge | 0 % |

Charges taken from the fund over a year

| | |
|-----------------|-------|
| Ongoing charges | 0,29% |
|-----------------|-------|

Charges taken from the fund under certain specific conditions

| | |
|-----------------|------|
| Performance fee | None |
|-----------------|------|

These are the maximum rates of entry and exit charges that may be taken from your funds before these are invested or before the income received from investments is paid out.

The ongoing charges figure is an estimate figure, based on the current management fee. Due to the reimbursement of the other expenses to the Fund, the figure based solely on ex-post calculation of the ongoing charge is not reliable. The annual report of the Fund for each financial year will include details on exact charges made.

The charges cover the Fund's management expenses, including the Fund's marketing and distributing costs. These charges reduce the potential growth of the investment.

For additional information regarding the charges, please see the 'Fees and Expenses Related to Funds' section from the prospectus.

PAST PERFORMANCE

The Fund's performance is calculated after the deduction of ongoing charges. The Performance is calculated in euros.

Past performance is not a guarantee for future performance.

The Fund is established on 22 September 2020.

PRACTICAL INFORMATION

Additional information about the Fund is included in the prospectus, rules and annual report, which are available on the management company's homepage and at the office of the management company as free copies in Estonian language.

Management company's homepage: www.swedbank.ee/fondid; **Phone:** (+372) 613 1606
