Manager Commentary

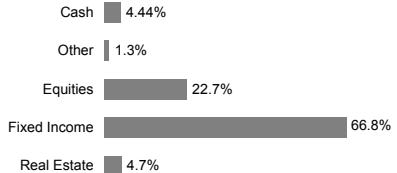

In April global equity markets showed the best performance in recent years and also risk premiums of different bond classes declined. At the beginning of the month we increased equity investments to the highest level in many quarters. Because of fast increase in stock prices we even had to slightly decrease our equity positions at the end of the month, because weight of equities in the fund started to reach the legally allowed maximum 25% limit. As a result of successful timing of rise in stock markets, the NAV of the fund increased 2.6% in a month and this also turned the return of the fund in 2009 clearly positive.

Currently we prefer developing markets' equities to Japan. In Europe and US we keep a neutral position.
