## Manager Commentary

Global risk appetite in financial markets continued to improve in May. All major equity markets where the fund invests posted a positive return, with Russia and Latin America leading the way (27% and 13% respectively in Euro terms). Swedbank Pension Fund K2 NAV increased by 0.7% in May and outperformed the benchmark by 40bp. The main positive contributors were overweighting emerging market equities and underweighting the euro government bonds.

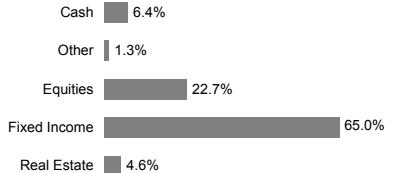

At the beginning of June we increased the equity exposure to the highest level since a year ago. We expect the improving global business cycle outlook combined with positive market sentiment and technical indicators to keep the equity market upturn intact. We maintain a positive view on Emerging market equities and hold the overweight position vs Japan and US equities.
