Manager Commentary

After strong July, most global equity markets continued their upturn in August. With the exception of the Emerging Asia region, where China's equity market tumbled on liquidity concerns, all markets where the fund invests in posted a positive return. First signs have emerged that after many quarters investors have started to allocate some funds also to smaller and less liquid equity markets. As a result, fund benefited the most by being invested to the Baltic region where both equities (up 35% in August) and high quality bonds showed a double digit return.

Despite a strong equity market rally over July and August, we have maintained and even slightly increased our positions to equities. We see that market technical indicators do not still show that most equity markets have been over bought. This coupled with continuous favourable liquidity environment (all major central banks have reiterated their policy support) and improving business cycle in developed markets will help to maintain a positive sentiment. Regionally we still favour emerging markets (notably the CEE region) and developed Europe over Japan and the USA. In fixed income universe our overweight positioning in credit has been slightly decreased after massive spread tightening over summer months. The fund has bought government guaranteed bank papers during the month to receive a yield pickup with the same risk. We have also bought Spain, Belgium, France, Portugal, and Italy government bonds during the month in order to balance the fund.

The value of the Fund's unit can either grow or decrease in time. The current return of the Fund shall not guarantee the same return in the future. Funds investing in foreign markets are vulnerable to monetary movements, which may lead to a growth or decrease of the net asset value of the Fund's unit. Pension Funds are founded on the basis of Funded Pensions Act. The following payment which conditionally consists of two parts - tax (4% portion of the social tax) and contribution (2% contribution of the state funded pension, withheld by the employer on the employee's gross wages) - shall be transferred to the mandatory funded pension account for a person who has joined the funded pension system.
