Manager Commentary

Swedbank Pension Fund V3 returned -1.9% in March with YTD performance of -1.0%. March was a turbulent month for the financial markets. While the earthquake and subsequent accidents in a nuclear power station in Japan had mainly influence on the equity markets and the civil war in Libya affected the oil price, the eurozone bond markets were given a slight shock at the beginning of the month by a clear message from the European Central Bank to start raising interest rates. Global equity markets declined mildly until mid-March, but then rebounded strongly in the second half of the month (except for Japan) due to a strong buying pressure driven by the emerging markets. The latter markets led the equity rally, thus ending the period of continuous underperformance in January and February. Markets in Asia (ex. Japan) rose fastest by 2.8%, while Russia and Latin America were up by 1.2% and 0.65% respectively (all in euro terms). Besides the worst performing equity market Japan (-11.7%) also Baltic and European equities finished month in a negative territory (down by -4.6% and -3.6% respectively). Euro strengthened against all major currencies. Economic news from US and Europe confirmed further economic growth. US unemployment rate also declined.

While during the last couple of months our short-term view on the equity markets has been negative we move to neutral positioning in April. We expect the equity markets to slightly outperform the bond markets because of strong price momentum and the corporate earnings revisions continuing to be positive despite the recent turmoil. Although the global liquidity readings have turned better and showed increasing liquidity flow to the markets we see a possible deterioration in the business cycle as a main risk due to the expected rises in the interest rates, slowdown of industrial production and the effect of higher oil prices. Regionally we prefer US stock market while we least like the emerging Asia stock markets.
