Manager Commentary

Swedbank Pension Fund V3 returned 2.1% in December and -10.5% in 2011.

The financial markets calmed somewhat before the year's end. The readiness of euro zone leaders to sign an intergovernmental agreement, which makes it easier to impose sanctions on states that breach budget discipline, added some positivity. The ECB also came up with a strong solution to the financing problems of euro zone banks by offering them low-interest three-year loans with milder collateral requirements. The banks used this opportunity much more actively than the markets had anticipated. Also, the "Save Italy" plan of Mario Monti and the long-term plan of Spain's new Prime Minister Mariano Rajoy, who was appointed before Christmas, to restore the state's AAA rating both demonstrated the clear intention of the struggling countries to resolve their budget deficit problems. The strong economic growth indicators of the US, which exceeded expectations, added another positive dimension. The improvement in labour market data continued and the confidence indicators in the industrial sector also offered some positive surprises.

The strengthening of the main developed equity markets was headed by the US (+4.7%, all in euros) and Western Europe also remained in positive territory (+2.2%). However, Baltic and Eastern European equities were relatively weak and ended the month at levels that were 4.7% and 3.9% lower, respectively. Negative political developments in Hungary weighted quite heavily on Eastern European markets. Emerging Asia and Latin America also strengthened (+5.1% and +2.1%) while political insecurity in Russia had a strong impact on its equity market (-8.5%). The euro weakened by 3.7%.

We closed the overweight on Russian equity markets and the underweight in Eastern Europe when signs of political instability emerged. Looking forward, we are neutrally positioned in terms of equity markets, because the risks associated with the euro zone are balanced by other factors, such as the expected economic growth of the US and the improvement of liquidity in the euro zone.
